

55 Years of Helping Animals
Live Their Best Life

ANNUAL REPORT

2022

The Animal Care Sanctuary's Lifesaving Mission:

Our LIFESAVING MISSION envisions a community that promotes turning compassion into action for dogs and cats by adopting healthy animals into loving homes, promoting the human-animal bond through outreach, education and advocacy, spaying and neutering to end the suffering of over-population and to improve public health, and the humane and compassionate treatment of all animals.

// FINANCIALREPORT //

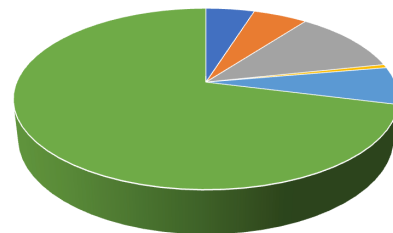

Our lifesaving work is made possible by many sources including, but not limited to: generous contributions from our community; grants; corporate giving; bequests; planned giving; adoption fees and clinic fees. We believe in being good stewards of our financial assets and rely on the community to support our mission. We are committed to efficiency and transparency!

2022 Revenue

- Adoption Income
- Donations- Individual, Business, Foundation
- Estates/Trusts
- Special Events Income
- Veterinary Clinic Income

2022 Expenses

- Animal Food
- Veterinary Clinic Supplies
- Repairs and Maintenance
- ACS Animal Care
- Outsourced Veterinary Services
- Wages, Salaries and Insurances

// EXECUTIVE DIRECTOR MESSAGE //

Dear Animal Care Sanctuary Family,

2023 is now well underway and it is a year that will be filled with exciting changes as we work to shape the future of animal rescue.

For 55 years, Animal Care Sanctuary has served as a vital resource for the animals of Pennsylvania and beyond. Two things have held consistent in that time: our focus and change. We remain as focused as ever on providing the best life possible for the animals we share our lives with, but how we do that is always progressing. With regularity, we ask ourselves “what’s next?” Staying on the forefront of best practices, we implement new programs to save lives like we never have before and to produce the best outcomes for all animals, both in our shelter and in the communities we serve. This past year has been one filled with success, growth, and forward momentum for ACS. 831 animals were adopted in 2022 and are now in loving homes with families who are happier and more complete. Keep in mind, each of these adoptions is a life positively transformed by you, our ACS family of supporters.

Adoptions don’t just come about when a loving family picks out an ideal animal companion and signs an adoption contract. Adoptions come about because people know when they are no longer able to care for an animal, ACS will. They come about because we are able to give animals excellent veterinary care immediately when they come through our doors, and because we are able to give them love, food, and a safe space. Adoptions come about because our foster volunteers give those in need a little extra help and the time they need to grow or heal. Adoptions come about because our animal behavior team develops specific training plans for those needing a little refinement. They come about because our transport team rescues animals from overcrowded shelters across the country and the world. Adoptions come about because you donate enrichment toys to keep them busy and blankets to keep them warm and comfortable. They come about when someone chooses adoption and space frees up for the next animal. Adoptions come about because of amazing people including a dedicated staff, incredible volunteers, generous donors, and a supportive community. Adoptions come about because of you!

Families in crisis sometimes feel they must resort to surrendering the pets they love because they do not know where to turn for temporary assistance with pet food, veterinary care, or behavior modification assistance. Animal Care Sanctuary is focused on keeping pets in their current home, because no matter how wonderful the shelter, it is no place for an animal to live out their life. Helping to keep animals in good homes is essential to reducing the homeless animal population.

In 2022, our humane education program brought lessons of kindness, compassion and the human animal bond to over 400 students in grades K-12. Our Pre-Veterinary college internship program, now in its 8th year, has grown so quickly in the past two years that we are looking to expand the program which currently allows us to accommodate two students each semester to allow more students the opportunity to participate and help end the current nationwide shortage of veterinarians..

Access to affordable medical care is something many of us take for granted but our community continues to struggle with this issue. Thanks to a partnership with Maddie’s Fund, our clinic was one of only 12 clinics in the country to be asked to join Open Door Access which works to provide affordable veterinary care to communities in need. This means that we have added to our clinic’s menu of services. Besides spay/neuter surgery, vaccinations and wellness exams, in 2022 we expanded our clinic offerings to include sick visits, blood work and small surgeries. We know these new services will allow us to diagnosis health issues before they become life threatening allowing us to treat them in the most cost-effective way.

Everyday in 2022, we adopted, microchipped, and provided veterinary care to thousands of animals. We took on the challenge of providing the community with the tools needed to keep hundreds of pets with the families who love them, and we grew our humane education program to allow our work to come full circle by assuring we are preparing the next generation to take up the challenge of animal overpopulation and homeless to assure the best possible future for animals.

We are committed to using the incredible successes of the past year as a foundation to do even greater things this year. But to do this, we need your help. Whether you can adopt, foster, donate, volunteer, advocate, or all of the above – we greatly appreciate you being part of the ACS family. Together, we were able to positively impact the animals across the country and the world – and we are resolved in our ability to make your continued support go even further in 2023 and save more lives! Great things are coming in 2023 as we look to change the landscape of what a traditional shelter looks like. Soon I will be reaching out with a special announcement about the future of sheltering, but first let’s celebrate all we accomplished together in 2022. 55 years of providing love, medical care, and innovation to change the future for animals that was the power of sanctuary in 2022.

Thank you for being part of the ACS family!! **Thank you for all you do every day for animals. ----**

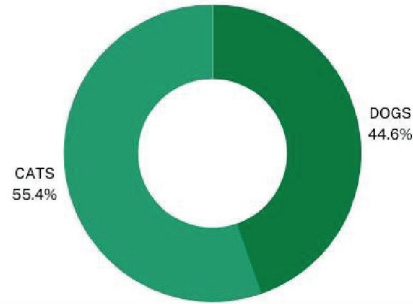

Terri

Future veterinarians

2022 Opening the Door to Access to Veterinary Care for Everyone!

As the pet population grows, America is also facing a growing shortage of veterinary care providers. Current projections suggest that 75 million pets in the United States will be without care by 2030.

At Animal Care Sanctuary we're always searching for better ways to provide care, to drive conversations and push limits that others may not. In 2022 we began to look at veterinary care in a new way, thinking about how we can deliver lifesaving services for pets and the people who love them. Maddie's Fund invited Animal Care Sanctuary to be one of only 12 clinics in the country to be part of their new initiative to address limited access to veterinary care, Open Door Access.

We're being deliberate about how we can cast the biggest net to reach as many people as possible with as many services as possible. What this means is we are now offering an expanded menu of services in our clinic.

Besides spay/neuter surgeries, wellness care and vaccinations, we now offer blood work, sick visits, small surgeries and in March 2023, we added dental cleanings for dogs and cats. I see the future of our clinic thriving as a valuable, trusted resource to the community. Everything about it is a win for animals and the people who consider them part of their family.

// SANCTUARY STORIES //

David & Goliath:

Hi! I'm Goliath and I'm so excited to tell you everything that has happened since I was adopted!

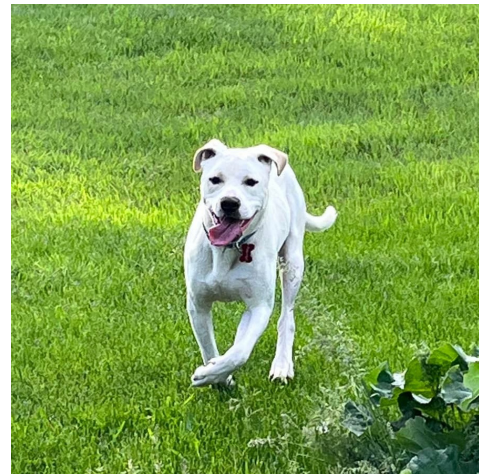

I came to ACS with my brother, David, back in December 2021 after being surrendered. A really nice family adopted David after just a few weeks, but unfortunately, I didn't pass the cat test so I stayed behind at ACS. I was so happy for my brother, but I felt sad being away from him. I kept hoping I would be adopted too, but months passed and I was still here at the shelter.

David's pawrents kept checking the ACS page, hoping that I would finally find my forever home. They were so excited when I was finally adopted, but that quickly turned to sadness when I was returned to ACS the next week. David's dad never could get over the fact that I was still here at the shelter. So guess what, they came back and adopted me! I am so excited they are my pawrents now too and I am reunited with my brother. When I first arrived at my furever home, we were sooo excited to see each other. I missed him so much! We were

finally reunited after 4 months!

My new family is the best! They got me a big, new bed and lots of treats and I was happy to share them with David and my new brother, Silas! I also got a really cool name tag, look at me showing it off in the pictures! Last week, we got to play and run around and then we got some pup cups after. They were sooo yummy! The other day, I got to help my mom plant some trees, she told me I was an expert digger and such a huge help! Oh, and I'm sure you were wondering, what about the cat test? Well turns out, I don't mind cats! I think I was just nervous when I did the cat test originally, or it was the stress of shelter life.

I am so so happy with my new family. I never thought I would be adopted by the same family as my brother! It's only been a few weeks since I went to my furever home and it's been the best time of my life!

// SANCTUARY STORIES //

Oracle:

Hi, Oracle here!

Have you heard? I finally found my furever home and I am SO happy!

I arrived at Animal Care Sanctuary back in February 2022 from a Best Friends Dog Rescue transport all the way from Georgia! My friends at ACS weren't sure why I couldn't walk, so they got me an appointment to find out. In March, I got to go to Cornell University College of Veterinary Medicine where they figured out that I was born with a spinal defect that prevents me from having full use of my hind legs. I've never let that stop me though!

The best thing EVER happened. I was adopted! I got to go home to my new family and meet my two new siblings, BeBe and Polona. I was soooo excited because I LOVE having other dogs to play with. We are all getting along great and I have become best friends with BeBe. She is actually another ACS alum and was adopted by my pawrents in 2020! We both feel so lucky to have found our furever home.

We had a really fun day where we all got to go to the pet store and pick out a toy. I was tired afterward! My family says we have really brought out the best in each other. BeBe has always been shy around new humans, but she did great at the pet store with me.

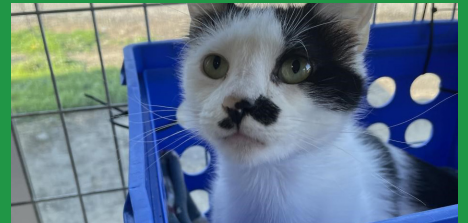

I can't wait to see what the future brings! Mostly, I am feeling so happy and thankful that my furever family looked past my disability and gave me a home. I am also feeling thankful for All Animals Matter, Inc., who sponsored my adoption fee, and everyone who supports ACS. Your support and donations help save animals like me who wouldn't have a chance otherwise.

Thank you

I can't wait to update you again soon on all my adventures!

Love, Oracle

Rainbow:

This black and white kitty came to us as a stray with six babies that were just days old. At the time, we were caring for a kitten whose mother had recently passed away, and we were hoping that this new mama would take him in as her own. Thankfully she accepted him immediately into her little family! She spent every day doting and fussing over her babies, including the adopted one. Since she turned that lonely kitten's life from a terrifying storm into a beautiful sunny day, we decided to name her Rainbow! She was the calm after the storm for him. Of course, we had to name her seven kittens Red, Orange, Yellow, Green, Blue, Indigo, and Violet.

Before we knew it, Rainbow nursed all seven newborns into healthy, energetic kittens and they were all quickly adopted.

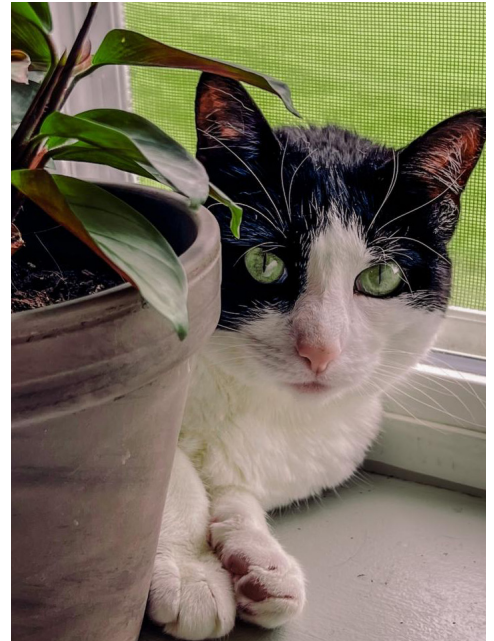

Then, our attention turned to finding Rainbow her furever home. First, we had to let her be a cat again! As many human moms know, it's sometimes hard to figure out who you are without your kids; the same thing went for Rainbow. As she spent time at ACS, she learned that she loved taking naps, especially the kind that kittens don't interrupt! After three months of Me Time, Rainbow found her forever home. On August 20, 2022 she went home to her family and was renamed Panda to match her coloring. But to ACS, she will always be the Rainbow after the storm.

// SANCTUARY STORIES //

Orca:

Hi, I'm Orca! I came to Animal Care Sanctuary back in June 2021 when my family had to move and could not take me with them. I had a rough start, as shelter life can be pretty scary to a cat that's never been there. I immediately moved into the adoption office – just me, myself, and I – to get some quiet time away from the hustle and bustle of the cat room and catio. Man, it was great! I really came out of my shell. The office staff said I did a 180! I went from being a girl who hid in her hideaway to now roaming the office. I often was found lounging on very important papers, reminding the staff that the work needed to get done. But, I needed attention first! My favorite thing to do was look out the window from the office. The staff even put a

bird feeder on the window so I could watch the birds all day; it was pretty great. I really enjoyed the attention from the people I was most comfortable with, but it didn't take long for me to get to know new friends too. They said I did a thorough stare-down or that 'I stare through your soul'. I wasn't sure what that meant. I just had to do the background checks! I was on special food; it was called 'urinary care'. It helped ensure that I didn't run into any urinary issues. It was amazing and tasted good too! This helped me stay away from the vet as much as possible because they SCARED me. In December 2022, I'm happy to report that I was adopted by a very loving family.

Through your support, we have accomplished more than we ever imagined possible!

Your 2021 Giving Tuesday support allowed us to bring Dogs Playing for Life to ACS in March 2022 to train our team on the use of dog play groups to enrich a dog's time in the shelter.

Your 2022 Giving Tuesday support helped us purchase much needed cat cages to assure our cats are living in the most stress-free environment.

We are so thankful for your continuous support of our mission. We will save countless animals' lives and enrich their time with us all thanks to your generous donations!

It Takes a Village!

Animal Rescue is the ❤️ of our Mission

Today animal rescue knows no boundaries- helping animals takes partnership and at Animal Care Sanctuary we know by partnering with other rescues more animals are saved. Sometimes rescue takes us across the country and sometimes, in the case of our dogs from Korea, across the world. You will see our van on the road bringing dogs and cats to ACS for the happy ending they deserve- When every other door for a pet has closed, ours will always remain open.

Changing the Future for Animals

Our goal as a non-profit is to change the future for animals and that future begins with changing the thinking of the next generation of advocates!

One of our three main pillars that guide our work at Animal Care Sanctuary is education. We strive to find ways to interact with students of all abilities and help teach our next generation of animal caregivers and veterinarians. In 2022, we focused on four areas to incorporate our homeless animals and leverage the human-animal bond either virtually or on-site here at ACS.

Tales for Tails Reading Program:

This new monthly on-site program is geared towards Pre-K to 3rd grade students to read to our cats. The story time hour consists of an animal-themed book reading, a fun activity and spending time with our feline friends reading independently.

Kindergarten – 12th Grade

Our objective is to continue to work with existing school curriculums and uniquely tailor our interactive program to the needs of each teacher and their class. In 2022, we worked with 13 classrooms and over 300 students. The program is delivered virtually and encourages student participation, engagement, inclusion, teamwork, structured decision making and research all within the context of animal rescue.

While working one-on-one with the teacher, we've utilized applied learning and in-service projects with a variety of subjects – Reading, Math, English, French, Special Education, Art, Computer Graphics, Creative Writing, Statistics & Analytics, etc.

Projects have been used to reinforce oral & written communication skills, reading comprehension, creative & persuasive writing, research, applied technology, equity, diversity, kindness and much more.

Animal Science Internship & Work CO-OP for 11th & 12th Grade:

This growing program allows students to rotate through our Community Clinic, Kennel and Cattery to experience first-hand what it takes to care for animals in a shelter. Our goal is to inspire students to want a career in animal rescue. Each internship varies in length depending on the student's schedule. In 2022, we began offering a Work Co-op position to teach the details of a caregiver position at ACS.

Pre-Vet/STEM Internship Program:

In 2022, we had a wonderful opportunity to work with six talented young women from all across the country who are striving to become future veterinarians. Since this program started in 2014, we've been fortunate enough to see 54 interns go through this program. The 12-week internship was designed to give undergraduate students the opportunity to experience all facets of shelter management including rotations through the cattery, kennel and veterinary clinic. Students are also part of our Alternative Housing program in which they foster and help train shelter dogs/cats who require behavioral modification training to increase their adoptability. Our continued partnership with Cornell University allows us to have access to the latest teaching methods in veterinary medicine, animal behavior and associated protocols.
